

仕様 RollerDrive specifications

動定格トルク Dynamic rated output torque

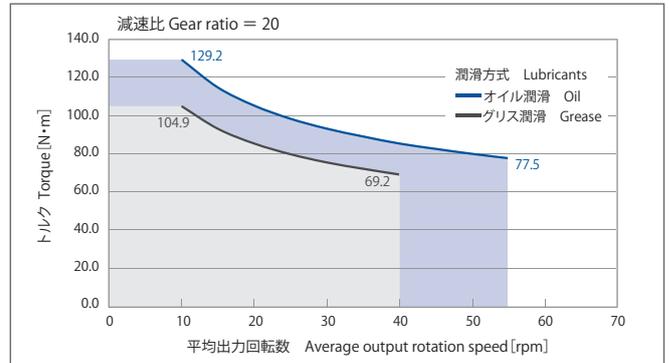

RollerDriveの期待寿命時間(12,000時間)を満たす条件として、出力軸に作用する負荷トルクの限界値を示します。動定格トルクは、平均出力回転数(定格回転数)によって変化します。

The dynamic rated output torque is value of load torque for which an expected service life of 12,000 hours or greater is ensured. The dynamic rated output torque is dependent on the average output rotation speed.
